Antithrombotic Drugs Market Size, Share, Report, Analysis, Trends & Forecast to 2022

According to Statistics MRC, the Global Antithrombotic Drugs market is accounted for $XX million in 2016 and is expected to reach $XX million by 2022 growing at a CAGR of XX% from 2016 to 2022.

Gaithersburg, US - May 16, 2017 /MarketersMedia/ -- Rising prevalence of chronic diseases associated with thrombotic disease require long-term administration of antithrombotic drugs, which is the key factor enhancing the demand for antithrombotic drugs market. Furthermore, growing geriatric population, increasing hereditary diseases, lack of physical activity, increasing awareness among patients about life-threatening diseases, changing lifestyles and increasing hypertension are the factors favouring market growth. However, off-patented drugs, postoperative bleeding and availability of generic antithrombotic drugs would restrict the antithrombotic drugs market growth. Furthermore, new product launches by key vendors, up-gradation in the antithrombotic drugs and recent R&D programs by major players to develop new drugs are the key opportunities for the market.

Asia Pacific is expected to grasp major revenue and volume share in antithrombotic drugs market and is expected to grow with a high CAGR during the forecast period. This growth is attributed to increasing patient population in China and India. North America and Europe regions have significant penetration of antithrombotic drugs due to continual R&D activities for new drug development and high prevalence rate of cardiac and cancer diseases.
