Digital Ranking Assets releases information on how its new Exclusive Solar Lead Generation service will change things in the Lead Generation for local solar business space for the better. Further information can be found at <https://www.linkedin.com/in/bestsolarleads>. Freiburg im Breisgau, Germany - June 1, 2017 /PressCable/ -- Earlier today, Digital Ranking Assets announced the launch of its new Exclusive Solar Lead Generation service, set to go live today. For anyone with even a passing interest in the world of qualified solar lead generation for local solar companies, this new development will be worth paying attention to, as it's set to shake things up. Currently, with even a passing glance, a person will notice how the same boring message is being spread. The founder at Digital Ranking Assets, Christian Ermlich, makes a point of saying "Things are going to change when our Exclusive Solar Lead Generation service launches".

Christian Ermlich continues... "Where you'll always see our competitors doing the same old thing, we will shift our focus on providing more customer care. We do this because we believe nobody wants to be bored and this is our way of spicing things up. Ultimately this is going to be a huge benefit to our customers because it will give them something nobody else has."

Digital Ranking Assets was established in march 2013. It has been doing business for enough years to know how to create a great service and it has always aimed to local lead generation dominating google's front page.

It is so important for a business website to be visible on the first page of Google's search results, because 91.5% of users never scroll past the first page of search results. Current insights show that 46% of all searches on Google are local, and 78% of local searches result in a phone call.

50% of local mobile searches visited local business within 24 hours. And 34% who searched on a computer/tablet did the same. This means ranking in a local search has a direct impact on in-store traffic. 18% of local mobile searches lead to a sale within 24 hours. 1-in-3 smartphone searches occurred immediately before a consumer visited a business.

In other words, capturing the local search market means first dibs for consumers who are in the final stages of the buying cycle, wallets out, ready to buy.

Currently, the closest thing to Digital Ranking Assets Exclusive Solar Lead Generation service is consultancies who charge way to much, but Digital Ranking Assets improved on this by speeding up the process and efficiency so it takes 24 hours instead of a week. This alone is predicted to make Digital Ranking Assets Lead Generation service more popular with customers in the qualified and exclusive lead generation for local solar business space, quickly.

Once again, the Exclusive Solar Lead Generation service is set to launch today. To find out more, the place to visit is Best Exclusive Solar Leads.
