

Thermalabs Launches Folding Beach Bed

Thermalabs has launched a brand new folding beach bed

June 9, 2017 (FPRC) -- Thermalabs has launched yet another product meant for the beach-going audience – the folding beach bed. This is a significant development coming at a time when the company is looking to dominate the beach convenience market. Over the last two years, Thermalabs has introduced a comprehensive range of beach accessories, all the way from beach chairs and T-shirts to beach shelters. The company appears to be set on a journey towards global dominance in this space.

Thermalabs is a leading producer of self-tanners and other cosmetics. The company is headquartered in New York City but operates a number of production factories in other parts of the world. When the company started out about 3 years ago, it launched a self-tanning lotion that was known as the original self-tanner. This was an accelerated tanning lotion that was designed from the likes of Aloe Vera, Olive Oil, and Japanese Green Tea. While ordinary lotions needed up to 6 hours to show results, Thermalabs pilot Tanner delivered a beautiful tan within just 4 hours. The success that the company recorded from its initial launch definitely played a major role towards making it the successful outfit it is today.

The new launch, Thermalabs folding beach bed, is now available online via Amazon.com. Traditionally, the company has launched all of its releases via Amazon. The company's products are also available via other popular third-party marketplaces. According to Alex Howard, marketing coordinator at Thermalabs, the folding beach bed can also be ordered directly from the company via Thermalabs.biz (which is the company's official online storefront).

Thermalabs has said that its folding beach bed is a must-have accessory for anyone who's looking to relax after a long dip in the water at the beach. The folding beach can support a weight of up to 225 lbs. and is over 6 feet long. The company has also said that their beach bed is lightweight and highly portable, plus it comes in a light green color that looks great against any backdrop.

Alex Howard, the Thermalabs coordinator for marketing, said, "We are delighted to announce the launch of our folding beach bed, which will be available in the market from now on. This is a classic beach accessory where users can relax after a long dip in the water. This bed is also great for people who'd like to read or just enjoy the sunset at the beach. Highly portable and lightweight, this product is created in such a way that it can support a weight of up to 225 lbs. It is also over 6 feet in length. Customers can get this product online via Amazon.com, as well as via our online storefront – Thermalabs.biz."
