

## **CertExams.com has Updated Comptia Network+ Labsim**

*CertExams.com updates Comptia Network+ labsim to include additional labs and chapter end questions.*

August 9, 2017 (FPRC) -- CertExams.com, a leading netsim and examsims provider, updated comptia netplus labs simulator recently. The update provides labs on IPv6, wireless networking, and others.

The advantages of using Network+ lab simulator include the following:

- Virtual labs for hands-on practice.
- Workstation, Server, WAP, Router and switch simulator.
- Simulate Cisco® IOS commands for routers or switches.
- Simulate various connectors like Serial, Ethernet, Frame Relay, and Gigabit Ethernet.
- Detailed Lab Manual provided.
- Support for 200+ router and switch commands.
- Designer provides drag and drop feature for installation and configuration of devices and connectors. GUI based device configuration.

Network+ Certification is awarded by CompTIA on successful completion of qualifying exam(s). Network+ is intended for candidates who have just started working on Computer networking using Workstations, APs, and switches. The exam objectives covered by Network+ certification include the following:

- 1.0 Network Architecture 22%
- 2.0 Network Operations 20%
- 3.0 Network Security 18%
- 4.0 Troubleshooting 24%
- 5.0 Industrial Standards, Practices and Network Theory 16%

The Network Plus Exam simulator is also available that consists of hundreds of most relevant questions with flash card explanations. The exam simulator is loaded with features like exam and learn modes, timer, font adjustment, night mode, full screen mode, etc.
