

Cersaie International Exhibition Opens Its Doors:

The international exhibition dedicated to the architecture and bathroom sector, Cersaie opens its doors from 26 to 30 September in Bologna, Italy.

August 30, 2017 (FPRC) -- The international exhibition dedicated to the architecture and bathroom sector, Cersaie opens its doors from 26 to 30 September in Bologna, Italy. With over 176,000 square meters and more than 1,100 exhibitors, Cersaie is the largest showcase in the world to discover the latest developments in ceramics, sanitary furniture, faucets, building materials.

The Graphenano group will be part of this edition with two of its companies. Graphenano Smart Materials, specializing in graphene additives for advanced building materials, will present its new micro cement system with graphene additive, Smart Cover Microcement, which improves the technical characteristics of conventional micro cement in terms of hardness, strength, impermeability, bactericidal character, workability and sustainability.

Graphenano Smart Materials will share GRAPHENE core stand, a subsidiary company dedicated to the manufacture and commercialization of sanitary furniture with graphene. In Cersaie 2017 will expose your shower trays with natural mineral filler with graphene additive in different models, textures and colors. The new ecological material they are made of, called Solid GRAPHEN, is the only bathroom for the world that is recognized with the Cradle to Cradle Silver certification as an innovative and sustainable product.

Graphenano Smart Materials will take advantage of Cersaie 2016 to make its products known to the best professionals in the construction, architecture and bathroom sector, as well as its adaptability and innovation for other projects related to these sectors. In addition to micro-cement and sanitary furnishings, Graphenano Smart Materials' range of versatility moves between high-strength special concrete, prefabricated concrete, high-decoration parts, insulation and thermal concrete, and many other projects in development that bring us one step closer More to 'intelligent construction'.

The Graphenano group will occupy the stand D33 of hall 30, located inside the facilities of the fairgrounds of Bologna Italy.
