

Cheektowaga Plumbers To Offer Commercial Plumbing Services

Cheektowaga Plumbers will begin offering commercial plumbing services to local businesses in Cheektowaga, Buffalo and Western New York starting in November.

September 25, 2017 (FPRC) -- Cheektowaga Plumbers announced Monday morning that it is adding commercial plumbing to its stable of services in Western New York state.

Formerly a 24-hour residential plumbing company, Cheektowaga Plumbers will offer a wide-range of emergency, repair, and maintenance plumbing options for local businesses and properties – big and small.

Cheektowaga Plumbers previously only did work for small business owners in its home base of Cheektowaga, NY. It will now offer commercial plumbing throughout the greater Buffalo-Niagara region.

“It was quite an undertaking to obtain the required licenses and hire plumbers with significant commercial experience, but we’re excited for the future,” said Dave Madison, owner and founder of Cheektowaga Plumbers. “Our commercial business customers can expect the same great service that we provide to residents in Western New York. We’re looking forward to getting started.”

Madison plans to officially begin offering commercial service before the start of the new year.

“Ideally, we’ll be ready by mid- to late-November,” he said.

Among the commercial services Cheektowaga Plumbers delivers are: drain cleaning, sewer cleaning, backflow prevention, water heater services, sump pump services, toilet repair, leak detection and repair, and more.

Cheektowaga Plumbers has a long history of providing quality and affordable plumbing services in Erie and Niagara counties. Madison, a master plumber for years, started the company with his brother and best friend in 1988.
