

Graphenano Presents Its Graphene Applications in the Construction Sector

Graphenano Group of Smart Materials, GRAPHENECORE and Graphenano Composites are the three subsidiaries of the group that will attend Construmat 2018:

September 29, 2017 (FPRC) -- Graphenano Group of Smart Materials, GRAPHENECORE and Graphenano Composites are the three subsidiaries of the group that will attend Construmat 2018.

From 23 through 26 of May, the most prestigious international construction fair in Spain takes place in Barcelona. In the Barcelona Building Construmat is the only event of its kind that includes all sectors of construction and brings together architects, manufacturers, commercial international buyers and leading companies in the sector. Construmat not only exposes the news but has become a forum for debate and reflection on the responsibility of the sector and the future opportunities it has, constituting itself as an international benchmark in innovation, knowledge and business.

In this edition of Construmat 2018, the Graphenano group comes with three of its subsidiaries, those in the field of architecture, interior design and construction.

Graphenano Smart Materials will announce its graphene additives for advanced building materials, such as concrete and special, high performance and environmentally friendly cements; as well as a new formulation of micromortero with graphene, SmartCOVER Micromortar, that guarantees decorative coatings of great resistance, hardness, elasticity and impermeability.

GRAPHENECORE will come with its shower trays of graphene and natural mineral charge, 100% ecological. The material that composes them, registered as SolidGRAPHEN, is Cradle to Cradle Silver certified, the most prestigious in the world that rewards innovation and sustainability. As a novelty, Construmat presents a new plate color, old gold, in a new texture that imitates the streaks of wood.

The GRAPHENECORE could also be used for kitchen and bath countertops as well as wall cladding and flooring. Davinci Stone Work is the only certified installer of SmartCOVER Micromortar as well as Neolith compact surfaces from the Spanish company the Sizes.

Some of the past projects have included Kitchen and Bath Countertops, Fireplaces, Floor covering, Wall cladding and Custom Furniture.
