

PeepLocal Launched and is Growing by the Hundreds Daily.

PeepLocal is a Local Community Site for local people to search for local events, local real estate for sale or rent, local jobs, local businesses and more.

October 18, 2019 (FPRC) --

PeepLocal has launched a local community site. PeepLocal was created with the idea of bringing local people together to find what they are looking for in their local community while making it affordable for local businesses to list their business on the site to be found by locals.

Linda Marie Ellis creator of PeepLocal started building the local citation site in May 2019 and officially launched the site in late July 2019. Since its launch its rapidly growing in members on average of 100 to 120 new members a day and as of today have over 11k members in three short months.

PeepLocal is not another “directory site”. PeepLocal is a local community site that offers great features and options to look up local events, local real estate listings, local jobs, local businesses as well as great articles that include recipes, health and fitness, family fun, interior design ideas and more.

There are three main membership types on PeepLocal. Consumer, Business and Entertainer Memberships, each offering a free membership level.

The consumer membership allows the member to view business profiles, save them to their favorite list, share them on social media, read blog articles, business articles, view real estate for sale and rent, view local job listings, find local events and things to do. They can post local garage sales, post real estate for sale by owner, and post events. Some postings are available for free and some can cost as little as \$1

The Business memberships have several levels of membership, starting at a free business listing to help get a business listed and providing them with an online boost and some SEO on search engines. Each step up on the business membership level adds more and more features allowing the business member more opportunity for better search engine optimization with features such as posting photos, videos, audio, business articles, events, a full profile page with an about page and more. A local business can improve their business SEO with as little as \$4.50 per month with a 7 day Free Trial. This low membership rate wont last, yet once a member is signed up at this level they will stay at that rate at as long as they membership is kept currant.

The Entertainer membership is for Local bands or Comedians. This level also has a free membership level and a paid level. This level allows the artist to set up their profile and promote their events, add photos, videos and audio, and much more. The purpose of this is to give locals a place to find these local music and comedy events and the entertainers more exposure.

Why PeepLocal is becoming such a hit; Local people are looking for a place they can find and support local businesses and events and local businesses are looking for an affordable way to boost their local business ranking and PeepLocal fulfills their needs.
