

Sewio Partners with C5MI for Managing Real Time Material Flow and Asset Utilization

Sewio, a UWB-based real-time location system (RTLS) vendor, today announced it has partnered with C5MI, the developers of Live Factory® for Industry 4.0 manufacturing.

Chicago, IL January 20, 2020 — Sewio, a UWB-based real-time location system (RTLS) vendor, today announced it has partnered with C5MI, the developers of Live Factory® for Industry 4.0 manufacturing.

“We are very excited to partner with Sewio on a live material tracking solution that will improve our customer’s business outcome. Their solution offers robust and highly accurate point tracking capability to optimize core manufacturing processes” said Marty Groover, Partner, C5MI. He added, “C5MI’s experience in Digital Manufacturing, Enterprise Asset Management and Operational Intelligence coupled with Sewio’s RTLS tracking capabilities is a compelling value driver for our customers as part of their Industry 4.0 journey.”

“It’s great to partner with an organization that shares the same vision of helping manufacturers and supply chains boosting their efficiency. This common goal and C5MI’s deep knowledge and first-hand experience managing world-class business processes will enable our customers with long-term value and continuous improvements to create the competitive advantage,” commented Milan Šimek, founder and CEO of Sewio Networks.

About C5MI

C5MI’s digital manufacturing services include Live Factory® and Digital Reliability Centered Maintenance® solutions that connect the shop floor to the top floor by gathering and presenting data, in a Common Operational Picture of the manufacturing and warehouse floor. Sewio’s location-based services enable real-time tracking of the exact location and movement of assets, including parts, assembled products and equipment, which help in maintaining efficiency in materials movement and maintenance processes. C5MI’s business and IIoT experience coupled with Sewio’s capabilities is a win-win for customers. C5MI is a subsidiary of YASH technologies which is a global company with 6,000 employees in over 40 countries.

About Sewio Networks

Sewio Networks (<https://www.sewio.net/>) provides a real-time location system (RTLS) for indoor positioning that drives business results for companies in the intralogistics, retail, sport, entertainment and livestock industries. The system is built on ultra-wide band technology (UWB) and delivered with RTLS Studio, remote management and visualization software.

It gives partners and customers a precise, easy-to-integrate, reliable and fully scalable IoT solution for the digitization of movement to allow process visibility, boost production efficiency, simplify the inventory process and increase safety. Founded in 2014, Sewio is headquartered in the Czech Republic with offices in Germany and France. Sewio has 29 system integration partners and powers customers in 37 countries. Customers include: Volkswagen, Budvar, Pirelli, Matador, TPCA, Škoda.
